

Add Computer to Temp Admin for Mac Intelligent Hub

Use this guide for adding a computer to the temporary administrator privileges for Mac computers. Once this process is complete, this allows an end user to enable temp admin through intelligent hub (not Manifest) to elevate privileges on their Mac. See these instructions for the end user's side: <https://confluence.med.wisc.edu/x/DoDjAg>)

Step-by-step guide

1. Sign into mdm.wisc.edu using AD\netID and then navigate to Groups & Settings > Groups > Assignment Groups

All Settings

Configurations

2. search for temp admin. Click on SSIT-TEMP Admin

Assignment Groups 🏠 ⭐

Filters » ADD SMART GROUP EXPORT temp.admin

Groups	Managed By	Group Type	Assignments	Exclusions	Devices
SSIT-TEMP Admin	Shared Services IT	Smart Group	2	0	8

3. Type in the computer name and add the device (note, device must already be in MDM). Click Next, then Click Publish. Changes should sync to the client usually within 15 minutes.

Edit Smart Group ✕

Name: 🔍
