

Add Computer to Temp Admin for Mac Intelligent Hub

This page was moved to kb.wisc.edu/134039
Click in the link above if you are not automatically redirected in 10 seconds.

Use this guide for adding a computer to the temporary administrator privileges for Mac computers. Once this process is complete, this allows an end user to enable temp admin through intelligent hub (not Manifest) to elevate privileges on their Mac. See these instructions for the end user's side: <https://confluence.med.wisc.edu/x/DoDjAg>

Step-by-step guide

1. Sign into Workspace ONE server <https://mdm.wisc.edu> using Username: AD\netID
 - a. Navigate to *(bottom of side menu)* **GROUPS & SETTINGS** > **Groups** > **Assignment Groups**

All Settings

Configurations

2. Search the list for "temp admin". Click on **SSIT-TEMP Admin**

Assignment Groups

Filters » [ADD SMART GROUP](#) [EXPORT](#) temp.admin

Groups	Managed By	Group Type	Assignments	Exclusions	Devices
SSIT-TEMP Admin	Shared Services IT	Smart Group	2	0	8

3. Scroll down to the bottom of the list. Under "Enter device friendly name." type in the computer name, and click **ADD**. (Note: the device must already be enrolled in MDM)
 - a. Click **Next**, then select **Publish**. (Note: changes should sync to the client usually within 15 minutes)

Edit Smart Group

Name: SSIT-TEMP Admin
Managed By: Shared Services IT

Choose Type: [CRITERIA](#) [DEVICES OR USERS](#)

Device Preview: [ENABLED](#) [DISABLED](#)

Devices 6 Selected

- ☒ SMPHAD-JGALLI2
- ☒ ssitad-itmunz
- ☒ ssitit-mac12
- ☒ SSITONC-HDLAB7
- ☒ SSITBMC-BROWD1
- ☒ SSITBMC-DBLAB1

Enter device friendly name. [ADD](#)

Users 1 Selected

- ☒ David Munz (demunz) demunz@wisc.edu

Enter username, first name or last name. [ADD](#)

Live View disabled to enhance performance.
