

Changing GlobalProtect to SMPH VPN (PC)

This page was moved to kb.wisc.edu/134306
Click in the link above if you are not automatically redirected in 10 seconds.

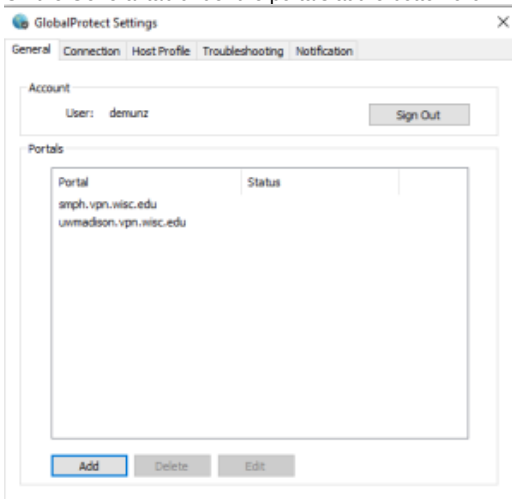

This article covers how to add the SMPH VPN Gateway to GlobalProtect on your PC. You can use this as an alternative to uwmadison.vpn.wisc.edu for potential better performance and IT management.

Step-by-step guide

1. Open Global Protect settings by Clicking the global Protect icon in the system tray
2. Go to the three bars at the top and go to settings

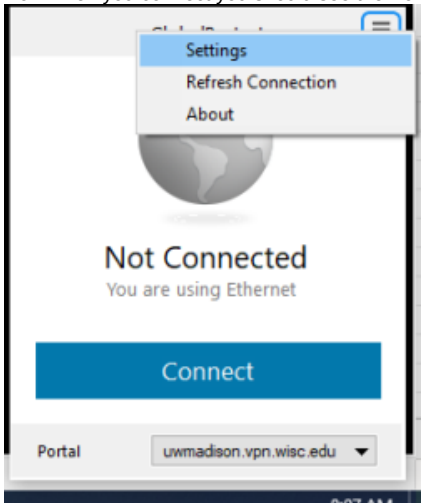

3. On the General tab under the portals at the bottom click Add

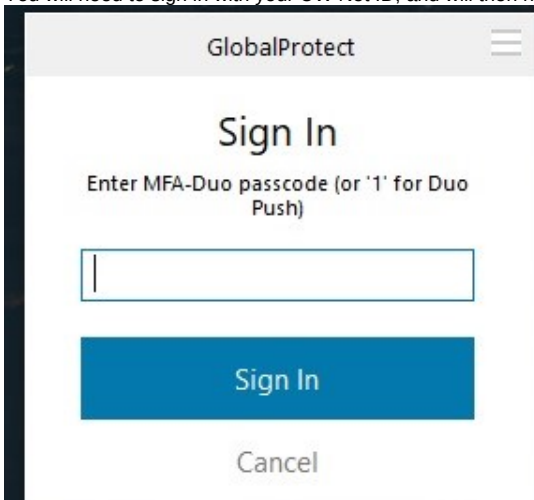

4. When asked for a portal address, enter in **smph.vpn.wisc.edu** and click "Save"

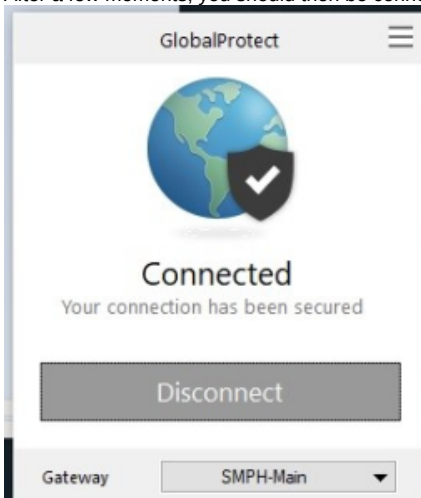

5. Now when you connect you should see the Portal option at the bottom.

6. select the smph.vpn.wisc.edu Portal and connect
7. Enter netid and password
8. You will need to sign in with your UW Net ID, and will then need to type in a 1 to receive a DUO Push

9. After a few moments, you should then be connected to the SMPH-Main SMPH VPN Portal
