Data Visualization and Reporting Platform (Qlik Sense)

Qlik

Qlik (pronounced "click") Sense is a web-based data analytics platform, hosted by the UW School of Medicine and Public Health. It allows users to interact with data through visualizations, filterable reports, and other formats.

Curated institutional data is available through the SMPH Qlik platform, including data from campus, UWHealth, and additional SMPH-specific data sources. This includes HR, financial, facilities, and educational data. Research data is, at this time, limited to research administration or fully de-identified data.

Dashboards and reports are created in Qlik Sense by SMPH IT, as well as by developers from other units within SMPH, giving groups the freedom to build to their own needs and specifications with a combination of their own data alongside centrally curated data.
