Bookmarks backup and restore - Firefox browser

This page was moved to kb.wisc.edu/134195 Click in the link above if you are not automatically redirected in 10 seconds.

BACKUP

- Open the Firefox browser.
- Press the Control + Shift + B keys on the keyboard.
- Select Import and Backup Backup...

Save the bookmarks (Ex. bookmarks-2020-11-13.json) file, to your desired backup location (USB, network home drive, cloud drive, etc.).

RESTORE

- Open the Firefox browser.
- Press the Control + Shift + B keys on the keyboard.
- Select Import and Backup Choose file ...

	File nar	me: bookmarks-2020-11-13.json		✓ JSON Open	Cancel	~

- A message should pop-up "This will replace all of your current bookmarks with the backup. Are you sure?" Since you likely have not saved any new bookmarks yet, click **OK**.

Revert B	lookmarks	×						
This will replace all of your current bookmarks with the backup. Are you sure?								
	OK Cancel							

Note: If you have existing bookmarks on a computer, and you do not want to overwrite them (only add to them), use the **Import/Export Bookmarks from HTML...** (.html rather than the .json) backup file method. (see links at bottom of page)

- The Bookmarks should now be restored, and available in the browser.
